**In Re: Patent Application of John Joseph King et al**

Appln. No.: 10/002,799 : Conf. No.: 3842

Filing Date: 2 November 2001 Examiner: DIVECHA, Kamal B.

Group Art Unit: 2151 : Attorney Docket No.: RCL-011-1

Title: Method of providing a screen cover on a cellular phone

Attached please find Discussion Points and proposed claim amendments (page 2) in regard to the telephone interview scheduled for Tuesday, October 21, 2008 at 1:00 p.m.

**Claim 21 and Santoro**

- 1) "Provided by" in Claim 21
  - a. Interpretation of "provided by" as "equivalent to transferring the website ... through the WSP." (Non-Final Office Action, page 6 – 7)
  - b. See Proposed Claim Amendment
- 2) "Wireless service provider" in Claim 21
  - a. Interpretation of the ISP from Santoro is the same as the "wireless service provider" in the claim. (Non-Final Office Action, page 4 – 5)
  - b. Santoro, Column 23, line 31 – Column 24 line 13.
  - c. Applicants' specification at page 6, lines 3 – 11 for the stated difference between an ISP ("a wireline connection") and a service provider "associated with a telecommunications network" for wireless communications.

If you have any questions, please feel free to contact me.

Andrew W. Spicer, Esq.

## Proposed Amendments to Claim 21:

21. (currently amended) A method of accessing a picture file received from a cellular telephone, said method comprising the steps of:

receiving said picture file at said cellular telephone;

simultaneously displaying a plurality of picture files on a display of said cellular telephone;

enabling a first user to change information displayed with said received picture file by way of a user interface on said cellular telephone;

providing a separate selection option for each picture file of said plurality of picture files when said plurality of picture files is displayed on said cellular telephone;

enabling the first user to separately select a selection option for each picture file of said plurality of picture files;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files;

enabling access by said first user, remote from said cellular telephone by way of a webpage provided by hosted by a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a second user to separately select a selection option associated with each picture file of said plurality of picture files displayed on said webpage by way of said webpage.
